en-US.md 2025-05-19

Welcome to your new **Zero Split Ergonomic Keyboard** by **Onspry**. This guide will help you set up your keyboard quickly and troubleshoot any issues you may encounter.

What's in the Box

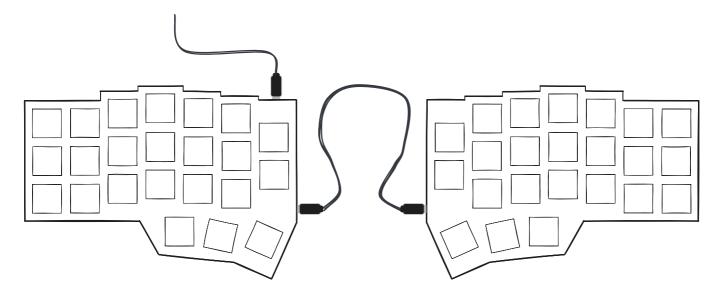

- 1x Left keyboard half (with USB-C to PC connection)
- 1x Right keyboard half
- 1x USB-C to USB-C cable (1 meter) for connecting to your PC
- 1x USB-C to USB-C interconnect cable (25 cm) for linking both halves

Getting Started

Step 1: Connect the Two Halves

Use the included 25 cm USB-C cable to connect the left and right halves of the keyboard.

- Plug one end of the cable into the USB-C port on the left half.
- Plug the other end into the USB-C port on the right half.

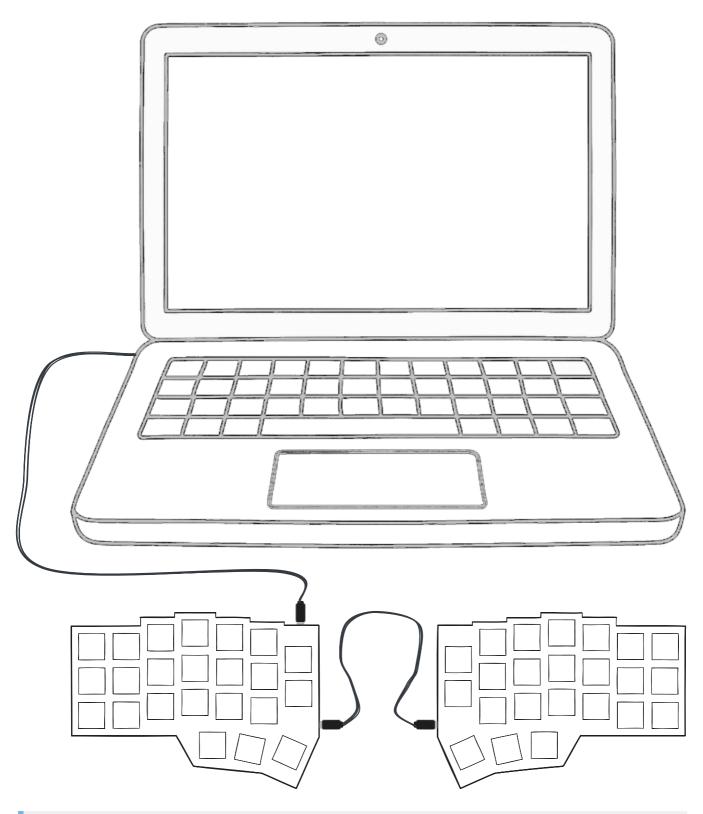

∇ Tip: The interconnect cable is reversible—there is no dedicated "in" or "out" port on either side.

Step 2: Connect to Your Computer

Use the 1 meter USB-C to USB-C cable to connect the left half to your computer's USB-C port.

- Plug one end into the USB-C port on the left half.
- Plug the other end into your computer.

en-US.md 2025-05-19

Only the left half needs to be connected to the computer. The right half draws both power and data through the interconnect cable.

✓ You're Ready to Type!

Your operating system should automatically recognize the keyboard. No additional drivers are needed for basic functionality.

Troubleshooting

en-US.md 2025-05-19

Issue	Solution
Only one half is responsive	Ensure the interconnect cable is securely connected.
Keyboard not detected	Try a different USB-C port or cable.
Slow or unresponsive keys	Check all cable connections and try restarting your PC.

Firmware Updates & Keymap Customization

The Zero keyboard supports advanced customization via QMK or VIA.

- Customize key mappings, layers, and macros.
- Download firmware or configuration tools from: onspry.com/firmware

△ Modifying firmware is optional and intended for advanced users.

Final Tips

- Keep cables neatly arranged to prevent wear or accidental disconnection.
- Avoid plugging or unplugging the interconnect cable while typing.
- For enhanced comfort, consider using a wrist rest or split keyboard tenting accessories.

Thanks for choosing the **Zero Keyboard** by **Onspry** — where comfort meets precision.

Happy typing!
